Cavotec gearing up for OTC 2011

We will be exhibiting at one of the world's leading trade shows for the offshore energy industry, [OTC](#), that gets underway next week in Houston.

Our range of advanced products in the offshore sector includes [radio remote controls \(RRCs\)](#), [Brevetti chains](#), [power connectors](#), [Gesmann crane controllers](#), [cable reels](#) and Ex collectors.

First held in 1969, the Offshore Technology Conference (OTC) highlights the development of technologies that serve the offshore industry in the fields of drilling, exploration, production, and environmental protection. The annual event is held in Houston, Texas and attracts some 65,000 visitors and 2,000 exhibiting companies from more than 110 countries.

Our stand this year is part of the Norwegian Pavilion – #5235 – which we will be sharing with [Norsafe](#) and [TTS Energy](#).

[Click here for a full exhibition booth map](#)

TTS Energy and Cavotec partner on several projects for the offshore industry. See the short film below [describing their activities](#) in the sector.

And we've covered examples of the sort of applications we partner on our corporate blog:

[Plain Sailing for Remote Controlled Unmanned Vessel](#)

Cavotec is a leading engineering company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification

solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
