Gulfaks B drag chain project underway

Cavotec's largest oil and gas project to date - [upgrading Statoil's Gulfaks B drilling platform](#) - is now fully underway and is proceeding well.

Our engineers recently began work on the installation, one and a half months ahead of schedule.

The guide system for one chain system is now mounted, and our customer, Aibel, a leading engineering, construction, upgrading and maintenance service provider in the oil, gas and renewable energy sector, is happy with progress.

Cavotec is supplying, testing and commissioning three sets of stainless steel drag chains as part of a major modernisation programme that will extend the operational life of the Gullfaks B platform to 2032.

Cavotec supplies advanced power control and automation technologies to a wide variety of offshore energy customers worldwide.

Cavotec is a leading engineering company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
