Cavotec streamlines manufacturing of electrical connectors

Following the conclusion of consultation discussions with union representatives, which were made public on August 21, 2017, global engineering group Cavotec is announcing today the transfer of manufacturing of electrical connectors from its plant in Sweden to its facility in Italy as part of an ongoing rationalisation programme.

The move is part of an overall process that will improve the efficiency of Cavotec's engineering operations and innovation excellence through the consolidation of product lines at the Group's Centres of Excellence, thereby

further improving the Group's capacity to serve customer needs.

Operations at Cavotec Connectors are provisionally scheduled to conclude before the end of 2017, after which all deliveries of the full Connectors range will be made from Cavotec's Centre of Excellence in Italy.

Cavotec is a leading cleantech company that develops connection and electrification solutions that enable the decarbonisation of ports and industrial applications.
