Cavotec gears up for Offshore Technology Days

Ready for the off(shore): the Cavotec team at a recent OTD

Our offshore technologies experts are preparing for the [Offshore Technology Days\(OTD\)](#) trade show which gets underway tomorrow at the home of the Norwegian energy industry Stavanger.

The team will be showing how our innovative technologies - Radio Remote Controls, (EX and non- EX), Gessmann joysticks, hose and cable reels, onshore Alternative Maritime Power solutions for offshore vessels, connectors, and drag chains, (nylon and steel) - are helping our customers operate efficiently, safely and cleanly in some of the most demanding environments on Earth.

If you are one of the 30,000 visitors heading to the exhibition, don't forget to meet the Cavotec team at stand 2400 in Hall B.

Attracting engineers, technical specialists, industry leaders and experts, OTD is now in its 17th consecutive year. With more than 500 exhibitors expected this year, organisers claim that OTD is one of the fastest growing oil exhibitions in the world.

We want to contribute to a future world that is cleaner, safer and more efficient by providing innovative connection solutions for ships, aircraft and mobile equipment today.
