Cavotec's radio remote control experts at ONS2012

Cavotec's [radio remote control \(RRC\)](#) experts - [Cavotec Micro-control](#) - recently took part in a highly successful [ONS2012](#), one of the offshore energy industry's largest exhibitions. Held in Stravanger, Norway, between August 28 and 30, the event attracted some 50,000 attendees.

The Cavotec team was on hand to show visitors how our innovative technologies are helping the industry to operate more safely, more cleanly and more efficiently. Key product areas included [RRCs](#), joysticks, drag chains, [connectors](#) and [motorised cable reels](#), primarily for EX applications.

Our stand - as the entire event - was busy, with even Norway's Minister of Petroleum and Energy, Ola Borten Moe, dropping in to try his hand at operating an excavator using one of our advanced RRC video link systems.

Following the success of ONS in recent years, the event will now be held annually, rather than bi-annually as previously: we're already looking forward to ONS2013!
