## Exploring new opportunities at a packed OTC 2014

We're at the vast [#OTCHouston](#) exhibition this week, and judging by the sheer number of visitors, you can see why it's one of the largest trade shows in the offshore sector.

According to organisers, OTC ([the Offshore Technology Conference](#)) is "the world's foremost event for the development of offshore resources in the fields of drilling, exploration, production, and environmental protection."

At this year's event we're exhibiting our range of systems for offshore energy and maritime applications, including steel drag chains, radio remote controls (of the explosion-proof and standard varieties), [MoorMaster™ automated mooring](#), [AMP](#), [cable chains](#), [power connectors](#), [slip rings](#) and [motorised cable reels](#).

The Cavotec team tell us that our radio remote controls – used, amongst other things, for operating machinery in harsh environments – are attracting particular interest.

“A lot of people are asking about our radio remote control systems; it's a market where we certainly see a great deal of potential,” says Sofus Gedde-Dahl, Managing Director, Group Sub-unit Oil & Gas.

If you happen to be at OTC, do drop in to see us at stand 5235!

---

We want to contribute to a future world that is cleaner, safer and more efficient by providing innovative connection solutions for ships, aircraft and mobile equipment today.
