Cavotec to exhibit innovative technologies at OTC Houston

We are gearing up for another offshore extravaganza at one of the world's leading trade shows for the energy industry, [OTC \(Offshore Technology Conference\) HOUSTON](#), which gets underway on Monday.

During the show, we will be focusing on several product areas including explosion proof (Ex) (and non-Ex) [radio remote controls](#) (RRC), [Alternative Maritime Power](#), [cable chains](#), [power connectors](#), [slip rings](#) and [motorised cable reels](#).

Billed as highlighting "the development of technologies that serve the offshore industry in the fields of drilling, exploration, production, and environmental protection", the event attracted almost 90,000 visitors in 2012, and some 2,500 exhibiting companies.

As in previous years, we are in the Norwegian Pavilion, and you will find us at booth 5235. [Click here for a full exhibition booth map.](#)

Cavotec is a leading cleantech company that develops connection and electrification solutions that enable the decarbonisation of ports and industrial applications.
