Shore power in LA and San Francisco: all the latest from our globetrotting film crew. #Cavotecfilm

In the most recent stage of our round-the-world film trip, we have successfully filmed our shore power systems in operation at San Francisco's [Port of Oakland](#) and at the [Port of Los Angeles](#) (POLA).

At the Port of Oakland we obtained some excellent footage of AMP connecting to the APL Singapore, a 4,800 TEU container ship. And at the POLA, under clear blue skies, we were able to film AMP Mobile, see image above.

We're currently at [Las Vegas McCarran International Airport](#) to film fuel pit systems, and will then be heading to the [Port of Virginia](#) for footage of our cable reels on STS cranes.

For the latest news from the trip, and to leave comments, you can visit our Facebook page at:
