Zero-emission Concept Terminal Launches World Tour

The terminal and handling centre concept seeks to demonstrate that ports, if designed and organised appropriately, will be able to operate without generating any air-, sea- or land-based pollution. You can learn more about the project in the film below.

[WWL](#) hopes the initiative can show renewable energy sources, such as solar and wind power, and building and equipment design can combine to ensure that ports operate with minimum environmental impact. The Group believes the concept will come to fruition by 2020. The Castor Green Terminal tour gets underway at the [Automotive Europe Conference](#) in Bonn, Germany, that starts on March 1.

Cavotec is a leading cleantech company that designs and delivers connection and electrification solutions to enable the decarbonization of ports and industrial applications.
