Cavotec renews Service Level Agreement with Boreal Sjø in Norway

We are pleased to announce that Cavotec has renewed its Service Level Agreement (SLA) with Boreal Sjø AS, a leading ferry operator in Norway. The agreement spans 3.5 years, with an option to extend for an additional year, and covers preventive maintenance and support for Cavotec systems installed on three ferry routes: Kvanndal–Utne–Kinsarvik, Skånevik–Utåker–Matre, and Molde–Vestnes.

These routes are equipped with Cavotec's advanced MoorMaster automated mooring systems and PowerAdapt shore power solutions – technologies designed to boost operational efficiency and reduce environmental impact.

This agreement builds on a long-standing collaboration between Cavotec and Boreal Sjø. By ensuring reliable maintenance, the renewed SLA supports Boreal Sjø in maintaining uninterrupted operations across its ferry network.

“This renewal underlines the continued trust in our technology and service capabilities,” said Patrick Baudin, President Services Business. “We are proud to support Boreal Sjø in delivering uninterrupted operations with high system availability across these critical routes.”

Cavotec is a leading engineering company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
