Cavotec signs EUR 1.55 million shore power order for Port of Antwerp-Bruges cruise terminal

Cavotec has signed a shore power order from Equans for the Port of Antwerp-Bruges in Belgium with a total value of approximately EUR 1.55 million. The system will contribute to reduced emissions and supports compliance with international environmental regulations.

The project, which is co-funded by the European Union, will enable cruise vessels calling at the terminal to connect to shore-side electricity, allowing them to shut down their onboard generators and reduce emissions while

berthed. As part of the agreement, Cavotec will also provide maintenance services for the equipment for a period of five years. Delivery is scheduled for the third quarter of 2026.

“This order reinforces our strong position in the shore power market for cruise applications and highlights the trust customers place in our technology as ports accelerate their transition to clean operations,” said David Pagels, CEO of Cavotec.

It also further strengthens Cavotec’s position as a leading supplier of shore power solutions for the cruise sector and supports ongoing efforts to decarbonise the maritime industry.

Cavotec is a leading cleantech company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
