Cavotec signs EUR 8.1 million shore power order with leading global container shipping company

Cavotec has signed an order valued at EUR 8.1 million with a leading global container shipping company to deliver complete shore power systems for newly built container vessels. The order includes cable management reels and weatherproof enclosures, with deliveries scheduled to begin in the second half of 2026.

Cavotec's systems will provide reliable cable management solutions, enabling vessels to connect to shore power while at berth. This reduces emissions and

supports compliance with international environmental regulations.

The new contract builds on a long-standing partnership between Cavotec and the customer, further strengthening their collaboration in advancing sustainable ship operations. Cavotec has previously supplied multiple shore power cable management systems to the customer, supporting their environmental and operational objectives.

“This contract confirms Cavotec’s strong position in the growing shore power market and marks a new milestone in our collaboration with one of the world’s top shipping companies,” says David Pagels, CEO of Cavotec.

Cavotec is a leading cleantech company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
