Cavotec to Launch New Shore Power Solution at TOC Europe

This June, Cavotec will be present at two key maritime industry events: **TOC Europe** in Rotterdam and the **Electric & Hybrid Marine Expo Europe** in Amsterdam. The company will launch a **new shore power solution for container ports** at TOC Europe and will showcase its latest **MCS Manual Dispenser** at both events.

Developed specifically for container terminals, Cavotec's new shore power system is a flexible, high-performance solution that supports ports in reducing emissions and improving operational efficiency. Its launch at TOC

Europe marks an important milestone in Cavotec's continued efforts to advance maritime electrification.

Visitors to both **TOC Europe (booth J40)** and **Electric & Hybrid Marine Expo Europe (booth 6085)** will also be able to discover the recently launched **MCS Manual Dispenser**. This compact, user-friendly system enables safe, efficient high-power charging of electric and hybrid vessels, making it ideal for ports and terminals that do not require full automation.

Cavotec experts will be on hand throughout both events to demonstrate the company's technologies and discuss how its solutions can support a more sustainable maritime future.

Event details:

TOC Europe 2025

17–19 June 2025

Rotterdam Ahoy, the Netherlands

Booth J40

Electric & Hybrid Marine Expo Europe 2025

24–26 June 2025

RAI Amsterdam, the Netherlands

Booth 6085

Cavotec is a leading cleantech company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
