New White Paper: How MoorMaster is Revolutionizing Mooring for Container Terminals

Cavotec's latest white paper explores how MoorMaster, our automated vacuum mooring technology, is transforming port operations – backed by data and insights from one of the world's most advanced container terminals, APMT Tanger Med 2 in Morocco. This investigative project provides real-world evidence of the efficiency and productivity gains MoorMaster delivers for modern container terminals.

The paper outlines how MoorMaster reduces mooring times and enhances

ship-to-shore crane productivity through improved vessel stability – resulting in measurable throughput improvements and cost savings.

Whether you are a terminal operator, port authority, or part of the global shipping value chain, this paper offers valuable insights into how automation is reshaping mooring – and why it matters for the future of your operations.

Read the white paper [here](#).

Cavotec is a leading cleantech company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications. With five decades of experience, our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.
